**DETAILED ACTION**

***Claim Rejections - 35 USC § 112***

1. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

2. Claims 1 and 3-8 are rejected under 35 U.S.C. 112, first paragraph, as containing subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. The specification, line 5 of page 4 to line 4 of page 5 discloses the closure member having an extension 6 which can be inserted behind a holding member 5 wherein a molded recess 8 acts like a hinge between the extension and the rest of the closure member. The holding member does not hingedly connect the extension of the closure member to the housing as claimed in lines 8-9 of claim 1.

***Claim Rejections - 35 USC § 103***

3. The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.
4. Claims 1 and 3-8 are rejected under 35 U.S.C. 103(a) as being unpatentable over Arbeiter in view of Pavely.

Arbeiter in figures 1-5 and 10 discloses a bicycle shift mechanism comprising a housing 2 having an opening 13 providing access to an end catch of a Bowden cable but does not disclose a closure member made from an elastomeric material connected to the housing via a holding member, said closure member having an extension, a thickened portion, a molded recess, an upper lip and a lower lip wherein said upper lip and said lower lip engage an edge of said opening. However, Pavely

Art Unit: 3682

teaches in figures 2 and 4, a closure member covering an opening in a housing having a hinge 18, an extension attached to the interior of the housing, said extension having a thickened portion. an upper lip 23 and a lower lip 27. Therefore, it would have been obvious to one of ordinary skill in the art at the time of the invention to modify the apparatus of Arbeiter in view of the teachings of Pavely to include a plastic closure member to cover the opening in the shift mechanism to provide a easily installed resealable closure member to decrease the overall manufacturing time and increase the overall convenience of gaining access to a Bowden cable.

### *Response to Arguments*

5. Applicant's arguments with respect to claims 1 and 3-8 have been considered but are moot in view of the new ground(s) of rejection. Although the closure member of Rausing can be detached from the housing, the closure member of Pavely remains connected to the housing when the installation opening is both covered and uncovered. Additionally, Pavely attempts to solve a similar problem as the present invention, that is, an easily installed releasable closure member for covering an opening in a housing for convenient access to inside the housing. As such, the teachings of Pavely are reasonably pertinent to the particular problem with which the inventor was involved and are analogous art. *In re Wood*, 599 F.2d 1032, 202 USPQ 171, (CCPA 1979).

### *Conclusion*

6. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO**

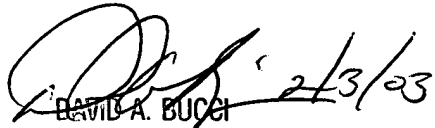

Art Unit: 3682

MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
